1. This application contains claims directed to the following patentably distinct species:

Species A, that directed to using a splitter; and

Species B, that directed to using a mirror.

The species are independent or distinct because the splitter is considered to be a specific optical element and the mirror is considered to be a specific method by which light is passed between the optical elements .

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-3, 5-12 and 14-18 appear to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

2. Applicant's comments directed to the art rejection have been held in abeyance pending a species election.
